

Regional Pathology Department, Bromley.

A regional Pathology department was required by Bromley Hospital NHS Trust to provide support service to their Acute hospital and open access for GP's, community health clinics Forensic and Police authorities incorporating Microbiology including Containment level 3 rooms and infection control, Chemical pathology including non isotopic immuno-assay sections, chromatography and electrophoresis, Haematology and Histopathology/Cytology laboratories.

As the department is heavily IT based and uses automated process a layout that allowed change to occur without affecting adjoining laboratories was essential.

The Department was incorporated into the masterplan for the New Princess Royal University Hospital.

Client: Bromley Hospitals NHS Trust
Project value: £5.5m for 1500m² as part of a 44,000m², £110m Acute Hospital Project

Regional Pathology Department, Bromley.
